Subject: Conchas Air Monitoring Management Plan

Folks:

I have identified a rep from the following agencies that will be key in reviewing the Management Plan. This is the plan that will spell out how we interact as one team in our roles and responsibilities as we sample for air. I believe if we keep our review of the plan to small amount of folks we can actually get it out. But if you think I forgot a key person, please include. The plan should be sent out to you by late this afternoon with a goal to get your comments in by noon tomorrow. More instructions forthcoming.
